TO EVERY EXECUTIVE... TO EVERY TYPIST...

... increased typing efficiency with less effort, maximum economy in operation and perfection of impression are of the utmost importance when considering which typewriter to purchase. The machine must look good, too. The Olympia SG 3 de luxe fulfils these requirements admirably — in fact, the whole design and construction of the machine — the many original and unique features embodied in it — ensure that these major requirements are exercised to perfection, from the typing of a script letter to the production of complicated tabular work involving many copies.

The finely adjusted touch mechanism gives that ease of fingering so essential to effortless typing — easily exchanged carriages provide multi-purpose adaptability — quick set and positive margins — clear and precise scales — half-spacing — automatic double-spacing — the good, solid feel of dependability — clean, modern lines — all these, and many more, give to the Olympia SG 3 de luxe that little extra pride of ownership that guarantees just that little extra output so essential today — and tomorrow.

Special Braille equipment for blind people, and Carbon Ribbon Attachments for prestige letters, giving high definitions for photography and duplication purposes. are also available on the Olympia SG 3 L.

Olympia machines provide an even right-hand margin – you use the half-spacing feature

Sales letters and circulars requiring an even righthand margin can be produced easily with the help of the "correcting space bar", and without the need for justifying attachments. Any letters or figures inadvertently omitted can be easily inserted.

This is a small selection only of the styles of type available. A very wide range of keyboards can be supplied for a large number of languages and specialist uses.

All SG 3 de luxe carriages are completely and easily interchangeable by the typist.

The Olympia factory – originally founded in 1903 – is the largest and most modern business machine plant in Germany. Completely re-established in Wilhelmshaven in 1946, it specialises in typewriters and adding machines only. The entire resources of its up-to-date machinery, rigid inspection methods, and craftsmen skilled in this type of production,

help to make Olympia what it is today – the world's most modern and efficient typewriter.

Olympia machines are sold and serviced all over the world. Famous everywhere for superior design and precision, modern up-to-the-minute features, and the finest of top quality materials.
