INTRODUCTION

A typewriter is a very complex mechanical machine. Up to 2000 parts are built into a standard office typewriter and any of these parts may cause trouble if not properly made, properly designed or properly assembled. It is therefore important that you, the customer, should know something about the factory producing the typewriter, their product and what service they can offer. We would therefore like to acquaint you with the OLYMPIA factory and their product.

OLYMPIA

Olympia has been manufacturing typewriters well over 50 years. From the very beginning they have concentrated on manufacturing a High Quality Product and, as a result, their typewriters are famous all over the world for their reliability and ease of operation. During the past 10 years, Olympia has built a completely new factory in the outskirts of Wilhelmshaven which, today, is the largest and most modern typewriter factory in Europe, employing over 11,000 workers.

TYPEWRITERS

High standards of craftsmanship, precision machines for the manufacture of parts, constant quality tests and controls make Olympia a typewriter which ensures maximum trouble-free service and many years of satisfactory use. Olympia specializes in the manufacture of typewriters which, together with decades of experience give them the know-how to build not only a quality product, but also a typewriter which is economical, writes fast and accurate and which you will be proud to own due to its modern design and construction. This is why we say:

OLYMPIA WRITES BEST OF ALL . . .  
BECAUSE IT'S BUILT BEST OF ALL

SERVICE

A nation-wide organization of Authorized Olympia Office Machine Dealers assures quick and efficient service. Olympia parts are available from extensive stocks in New York and through the Main Branches of the Ames Supply Company.

The following pages will give you a quick picture view of the Olympia factory and its products.
On the outskirts of Wilhelmshaven on the North German coastal plain the spreading buildings of the Olympia plant rise in a semi-rural setting. The latest models of machine tooling occupy more than a million square feet of floor space. Here are made the Olympia office machines, about half of which are exported to 139 countries all over the world.
WHAT MAKES Olympia AN
OUTSTANDING TYPEWRITER?

1. Quality, Precision and Finishing of all parts of the typewriter.
2. Master Craftsmanship.
3. Constant Quality Tests and Controls.
50 YEARS EXPERIENCE AND KNOW-HOW!

5. Ultra Modern Precision Machines.

Plus
- Inter-changeable carriages
- Automatic paper injector
- 46 spring-cushioned keytops
- Automatic tabulator clearance
- Convenient half-spacing
- 8 position touch control

- Paper support and page-end indicator
- Accurate and easy to set margin stops
- Emphasis key
- Correcting space bar
- Plastic alignment guides
- Perfect type alignment
OLYMPIA means PRECISION and QUALITY. Decades of experience in typewriter design plus constant quality checks ensure maximum trouble-free service. Every worthwhile aid to easier typing is standard equipment on OLYMPIA Typewriters including 46 spring-loaded, non-slip, anti-glare Finger-Form Keytops. An accurate, automatically locking segment shift ensures the perfect type impression — a clean, clear-cut imprint and uniform typing line.

AVAILBE WITH
12", 15", 18", 24" & 35"
CARRIAGES.

12" & 15"
CARRIAGES
ARE EQUIPPED
WITH PAPER INJECTOR.

MODEL SGI-L
with Bar Tabulator
The key-set tabulator produces columns quickly and easily. The extra long tabulator bar is placed in a convenient position, immediately above the typing keys, within easy reach of the fingers.

MODEL SGI-S
with Decimal Tabulator
Complicated tabulations and statements are easily produced with these decimal tabulator machines.

SG1 Standard Office Typewriters are equipped with every worthwhile feature for easier typing. These typing aids are yours at no extra cost and are illustrated and described in detail on pages 10 and 11. These typewriters are also available with Carbon Ribbon Attachment which gives letters that distinguished, "printed" appearance.

Refer to pages 17 to 23 for type styles and keyboards.
SINGLE INTERCHANGEABLE CARRIAGES

FOR SGI OLYMPIA STANDARD TYPEWRITERS

A special feature of the Olympia SGI Standard Type-
writer is its interchangeable carriage. Simply by turn-
ing the knob on each side of the typewriter as illus-
trated, the carriage is easily removed from the machine
and a carriage of a size to meet your requirements
can be put in its place.

Interchangeable Carriages are of par-
ticular advantage in offices where
wider forms are used only occasionally.
One 12” Olympia Typewriter with a
15”, 18”, 24” or 35” single carriage
will do the work of several machines
thus effecting a considerable saving.

AUTOMATIC PAPER INJECTOR

The Automatic Paper Injector can be set to feed individual line spaces from 3 to 18. A single pull, and the paper glides to the exact line required, in perfect alignment, ready for typing.

CORRECTING SPACE BAR

Sales letters, circulars or legal documents requiring an even right-hand margin can be easily produced with the help of the “correcting space bar”, without justifying attachments. The correcting space bar is also ideal for making corrections or for inserting letters or figures inadvertently omitted.

KEYTOPS

46 spring-cushioned, finger-form Keytops give a comfortable, feather-light touch and prevent finger fatigue. Olympia gives you 2 Bonus Keys at no extra cost compared to the Standard Keyboard.

Sales letters and circulars requiring an even right-hand margin can be easily produced with the correcting space bar

(WITHOUT CORRECTING SPACE BAR)

Sales letters and circulars requiring an even right-hand margin can be easily produced with the correcting space bar

(WITH CORRECTING SPACE BAR)

VERTICAL HALF SPACING

Half-spacing is ideal for index cards and standard ruled paper. Just put the line space dial on 1½ and your typing line will be aligned with the lines of the card or paper. Half-spacing is also very convenient for writing equations and mathematical problems.

AUTOMATIC TABULATOR CLEARANCE

Tabulator settings can be cleared automatically by a flick of the lever arm which is conveniently located on the left and right side of the carriage. This does away with the time consuming moving of the carriage from one stop to the other.
TOUCH CONTROL
The Touch Control can be set anywhere from 1 (light) to 8 (heavy). By turning the dial the touch control can be adjusted to suit your individual typing requirement.

PAPER SUPPORT & PAGE-END INDICATOR
The Plastic Paper Support keeps the type written page in clear view of the typist. It also serves as page-end indicator showing how many lines remain to the bottom of the sheet. Adjustable for 11" and 13" sheets. It also shows the number required for setting the automatic paper feed at the correct typing line.

PLASTIC ALIGNMENT GUIDES
The aligning scale helps in returning to the proper line level after erasures have been made. The typed line must register exactly with the top of the scale and the lines of the scale must be in the center of the letters. The aligning guide may also be used for the drawing of lines by inserting a pointed pencil in one of the holes of the aligning scale.

EMPHASIS KEY
Pressing down the spaced typing key will automatically set the machine on double spacing. This is an added convenience for writing headings or for emphasizing words. A light pressure on the spaced typing key shifts the machine back to normal spacing.

MARGIN STOPS
Accurate and conveniently located margin stops are easily adjusted by pressing down and sliding to position required. The margin release key can also be used to return typebars whenever the typist hits two or more keys at the same time.
MODEL SM3 DELUXE with Tabulator

The Olympia SM3 Deluxe Portable is so completely equipped, so soundly constructed in every detail, that it affords the highest degrees of ease in typing, adding increased efficiency to the typist's performance. The precision workmanship and fine quality materials used in its construction insures dependability even under the most severe usage.

An attractive streamlined carrying case is supplied with the Olympia SM3 Deluxe Portable at no additional cost.

OLYMPIA DELUXE PORTABLES are available in a choice of beautiful colors:

GREEN • GRAY • TAN • MAROON • WHITE • IVORY
GRAY/MAROON • IVORY/MAROON
MODEL SM3-13" DELUXE with Tabulator

The SM3-13" Deluxe is constructed and incorporates the same outstanding features as the SM3 Deluxe except that it has the wider 13" carriage which is especially desirable for tabulated work and long forms.

This medium size office typewriter is ideal for the small office and the professional man. Its sturdy construction guarantees long, satisfactory service under the most severe use.

A handsome carrying case and a plastic dust cover are supplied at no extra cost.

Available in the same beautiful colors as the SM3 Deluxe

Refer to pages 16 to 23 for type styles and keyboards.

The Olympia Robust (Military Model) typewriter has been designed to stand the hardest wear in an especially strong case. It is designed for use by the Armed Forces, Police, Expeditions, Building and Construction Units in the field and wherever a typewriter has to take a beating. All normally chrome plated outside parts are nickel plated and coated with a black protecting enamel, thus making the machine glare-free, and preventing any reflection of light. Within the carrying case, the machine is firmly held and cannot move. When the case is opened, the typewriter is ready for immediate use. The lid of the case is removable and can be used as a seat, if necessary under field conditions, while the machine can rest on the operator’s knees.

The Olympia Robust (Military Model) Typewriter is available with the standard 9½” carriage as well as with 13” carriage which is particularly useful for wide forms and tabulating.

Robust Typewriters are available only in green finish.

### SPECIAL ROBUST FEATURES

- 44 keys, 88 characters
- 12 carbon copies
- All steel construction
- All parts protected against rust and corrosion
- Typebars and segment heavily plated against rust
- Typebars of finest spring steel
- Half spacing horizontally for justifying copy
- Half spacing vertically for writing formulae, equations, etc.
- Sturdy waterproof and shock-proof carrying case of hardwood and steel construction

Olympia SF
LIGHTWEIGHT PORTABLE

LIGHTWEIGHT:
Weighs less than 10 pounds including carrying case.

COMPACT:
Will fit into a 3 inch high by 12 inch square drawer.

New!

Wherever you go, the Olympia SF Lightweight Typewriter will be your faithful companion, whether at home, in the office or when traveling. Its speed and smooth action will thrill you. You will marvel at the perfect letters you type on this truly remarkable typewriter. A host of exceptional features are yours in this compact, lightweight portable — designed to give years and years of satisfactory service.

Each Olympia SF Lightweight Typewriter is supplied in a handsome soft zipper case with pockets for your stationery as illustrated or in a light and attractive rigid plastic case.

OLYMPIA SF FEATURES

- 43 Glare-free finger form key tops
- Standard carriage width accommodating 9½” envelope
- Standard key spacing
- Standard platen diameter
- Three position line spacing
- Easily visible margin scale and margin stops
- Correcting space bar
- Paper support
- Alignment guides
- Carriage lock
- Perfect type alignment
- Automatic type bar return key
OLYMPIA Typewriters are available with many beautiful Type Styles which are shown on the following pages. Select one which appeals most to you and which may serve your purpose best.

For general office or personal use the regular ELITE and PICA Types have been and still are very popular. If you like to give your letters a distinctive look we would recommend our CONGRESS Types or perhaps the script types such as ITALIC or TECHNICAL ELITE which are more and more in demand. The GOTHIC Types are particularly suitable for billing purposes. For announcements and special purposes where a bold type is desirable, we suggest our #28 BULLETIN.

As a general rule we do not recommend broad faced types such as Congress or Technical Elite where many carbon copies (6-12) are needed or whenever stencil work is involved.

All the type styles shown on the following pages are available on our SGI Standard Typewriters. They are also available on our Portables except for the #87 12 pitch elite.
Letters going out on your Company's stationery are representatives of your firm.

OLYMPIA Typewriters, with their perfect type alignment and clear, cleancut type imprint give your letters a distinctive quality with good, legible carbon copies.

No. 7071       Swedish

MANY ADDITIONAL KEYBOARDS AVAILABLE UPON REQUEST

For foreign language and special keyboard machines add $5.00 to the unit prices as shown plus $.50 Federal Excise Tax. Required type changes can be made at an extra charge of $3.50 per type change plus $.35 Federal Excise Tax, excepting machines with exotic keyboards such as Arabic, etc.
These special signs are available in #12 pica type and some in #8 elite type.
MEMO TO: OFFICE MANAGER

SUBJECT: THE OLYMPIA SERVICE ORGANIZATION

We are proud of our nation-wide sales and service organization. It is composed of independent and locally owned and operated businesses, managed and staffed by people who have made office machines their lifetime careers. Olympia dealers have earned the respect and the confidence of the citizens of their communities through years of faithful and reliable dealings. All of them are experienced office machine specialists. You can deal with them with confidence.

Sales and service points are listed alphabetically by state and city on the following pages.

A complete master stock of Olympia spare parts is maintained in New York. In addition, the main branches of the Ames Supply Company carry stocks of Olympia spare parts.

Fred Johnson, Inc., Business Machines, 126 King Street, Charleston, South Carolina.

Dear Fred:

It’s been some nine or ten months now that we have had from two to six of your Olympia Typewriters in service in our office, and I’d like to be down on record as to how pleased we are with them.

Each of these machines has been used in a postcard addressing operation, for which the Olympia is eminently suited, turning out about three thousand cards per week per machine, with one insertion each for back and front. There have been only two service calls that I know of, one of which was a minor adjustment and the other the result of some carelessness on our part in handling the machine more than a couple of key stems became bound in a beat corn guide.

The chief advantages of the Olympia, as I see them are:

- Favorable comparison price-wise with American Standard Machines.
- Type alignment which is far superior to anything available from machines made in this country.
- Eject lever (we love it for addressing!)
- Ease with which the carriage can be removed for exchange with longer carriage, cleaning and adjustment.
- Longer ribbon life with three track ribbon.
- Automatic device with the space bar helps us, when we want to create an effect just a little different than the ordinary typed appearance. We haven’t yet experienced that loose, “slippery” feel that all used typewriters I’ve ever tried seem to have.

Ease of adjustment, rugged construction, paper and card guides and easy change of ribbons, both fabric and to and from the carbon ribbon.

I hope you’ll show this letter to anyone who comes to looking for a “good deal” in typewriters, and feel free to ask for a personal testimonial both as to the merits of the Olympia itself and to the prompt courteous service you folks have given us.

Sincerely,

Dave Reinberger

The Correcting Space Bar on your Olympia Typewriter makes justifying possible without the need for expensive justifying attachments.
The world-wide acceptance of Olympia Precision Typewriters as the standard of excellence can be attributed to the skill of our master craftsmen. Their zeal to produce the very finest is the reason that you get ever so much more value when you choose Olympia.
