

## OLYMPIA MODEL SKM

# THE NEW MANUAL FOR OFFICE CORRESPONDENCE

PRECISIONWISE . . . PERFORMANCEWISE and PRICEWISE the SKM — Olympia's mighty Correspondence office manual — is a wise choice for your typing needs. Beneath its trim, compact styling is a full range of big typewriter features, ready to accomplish a range of varied typing assignments.

Statistical and columnar typing is quick and easy because in addition to individual tab settings and clearance, the SKM has a total tab clear lever.

Horizontal half spacing accomplished by the correcting space bar lets your secretary insert omitted characters, and even justify right hand margins.

The wide 13" carriage means that the SKM will accommodate many larger-than-normal business forms.

The SKM has an automatic paper support and last line indicator.

Left and right margins stops are visible for instant easy access and accurate setting.

There are 3 ribbon selections: Black, Red, and Stencil Cutting.

The "see-thru" aligning scale and line drawing feature means perfectly even typewritten lines and precise hand-drawn lines for graphs and columns.

Titles or words are dramatically emphasized by the expand key which provides automatic double spacing.

Olympia's famous personal performance touch adjustment permits your secretary to set her SKM to suit her own typing comfort.

Test a high speed SKM . . . you'll love the touch. It is available in a wide choice of type styles . . . and foreign language keyboards, too! Olympia's exciting new SKM can easily be "customized" with special signs and symbols necessary for precise communications in a particular industry or profession.
