

The Codo Ribbon Aid is the most simplified and accurate system available for identifying and ordering typewriter, adding machine and calculator ribbons. The Codo Ribbon Aid is broken into two classifications: Typewriter and Adding Machine/Calculator. Each classification has an alphabetical and photographic cross reference system that works as follows:

- (1) If you have the machine name but are not sure the spool is right, first look up the name under the alphabetical listing.
- (2) Beside the name is a number. This is the Ribbon Aid number which corresponds to a photograph which is identified by this number.
- (3) By turning to the correct picture you can visually check to be sure the spool is right.
- (4) If the name and the photograph match up, you order or sell by the Ribbon Aid number.

When you order by the Ribbon Aid number you eliminate confusion and are assured you will get the **right** ribbon on the **right** spool.

All Codo ribbon boxes carry the Ribbon Aid number identification and, Typewriter Ribbons (1) through (9) are available in numbered and pre-priced blister packs for easy display and impulse buying.

Another Sales/Service Tool from **Codo Manufacturing Corp.**
